

Division of Oral Maxillofacial Surgery

Department of Human Biology and Pathophysiology

Outline

We educate the broad knowledge and basic skills for oral and maxillofacial surgery, mainly concerning the diagnostic procedure, treatment technique and the perioperative patient management. We also provide postgraduate courses of both basic and clinical research nature.

The Oral and Maxillofacial Surgery Clinic treat with removal of wisdom teeth and management of facial trauma, facial deformity, temporo-mandibular joint disease, oral mucosal disease, benign and malignant tumors and dental implants.
